Low-Speed Wind Tunnel Testing By Jewel B. Barlow, William H. Rae, Alan Pope

A brand-new edition of the classic guide on low-speed wind tunnel testing. While great advances in theoretical and computational methods have been made in recent years, low-speed wind tunnel testing remains essential for obtaining the full range of data needed to guide detailed design decisions for many practical engineering problems. This long-awaited Third Edition of William H. Rae, Jr.'s landmark reference brings together essential information on all aspects of low-speed wind tunnel design, analysis, testing, and instrumentation in one easy-to-use resource. Written by authors who are among the most respected wind tunnel engineers in the world, this edition has been updated to address current topics and applications, and includes coverage of digital electronics, new instrumentation, video and photographic methods, pressure-sensitive paint, and liquid crystal-based measurement methods. The book is organized for quick access to topics of interest, and examines basic test techniques and objectives of modeling and testing aircraft designs in low-speed wind tunnels, as well as applications to fluid motion analysis, automobiles, marine vessels, buildings, bridges, and other structures subject to wind loading. Supplemented with real-world examples throughout, *Low-Speed Wind Tunnel Testing, Third Edition* is an indispensable resource for aerospace engineering students and professionals, engineers and researchers in the automotive industries, wind tunnel designers, architects, and others who need to get the most from low-speed wind tunnel technology and experiments in their work.

Editorial Review

From the Publisher

A revision of the standard book in the field of wind tunnel work. Updated to include the new electronic instrumentation and digital computers now in common use. Covers tunnel design, calibration, and the interfacing of computers and instrumentation.

From the Back Cover

A brand-new edition of the classic guide on low-speed wind tunnel testing While great advances in theoretical and computational methods have been made in recent years, low-speed wind tunnel testing remains essential for obtaining the full range of data needed to guide detailed design decisions for many practical engineering problems. This long-awaited Third Edition of William H. About the Author

JEWEL B. BARLOW, PhD, is Director of the University of Maryland's Glenn L. Martin Wind Tunnel. He is a former chairman of the Subsonic Aerodynamic Testing Association (SATA). WILLIAM H. RAE, Jr. (deceased) was associate director of the F. K. Kirsten Aeronautical Laboratory at the University of Washington and a charter member of the Subsonic Aerodynamic Testing Association. ALAN POPE is a former director of aerodynamics at Sandia National Laboratory. His other books include *High-Speed Wind Tunnel Testing* and *Wind Tunnel Testing*.

Users Review

From reader reviews:

Alfred Hoover:

Book is to be different for each and every grade. Book for children until eventually adult are different content. As it is known to us that book is very important normally. The book *Low-Speed Wind Tunnel Testing* has been making you to know about other know-how and of course you can take more information. It is very advantages for you. The publication *Low-Speed Wind Tunnel Testing* is not only giving you far more new information but also to become your friend when you experience bored. You can spend your spend time to read your e-book. Try to make relationship with all the book *Low-Speed Wind Tunnel Testing*. You never feel lose out for everything should you read some books.

Nancy Reese:

Hey guys, do you desire to find a new book to learn? Maybe the book with the concept Low-Speed Wind Tunnel Testing suitable to you? The actual book was written by well-known writer in this era. The book titled Low-Speed Wind Tunnel Testing is a single of several books which everyone reads now. This book was inspired many men and women in the world. When you read this book you will enter the new dimensions that you ever know before. The author explained their idea in the simple way, therefore all of people can easily recognize the core of this guide. This book will give you a lot of information about this world now. To help you see the represented of the world within this book.

Joshua Parsons:

In this age of globalization it is important to someone to receive information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, paper, book, and soon. You can view that now, a lot of publishers that print many kinds of books. The book that recommended for you is Low-Speed Wind Tunnel Testing this publication consists a lot of the information on the condition of this world now. That book was represented so why is the world has grown up. The language styles that writer require to explain it is easy to understand. The actual writer made some analysis when he makes this book. Honestly, that is why this book ideal all of you.

Gina Keller:

That reserve can make you to feel relax. This book Low-Speed Wind Tunnel Testing was multi-colored and of course has pictures on there. As we know that book Low-Speed Wind Tunnel Testing has many kinds or genre. Start from kids until young adults. For example Naruto or Private investigator Conan you can read and believe you are the character on there. So, not all of books are usually make you bored, any it makes you feel happy, fun and unwind. Try to choose the best book for you and try to like reading which.
