Editorial Review

Review

Ten essays, 1971-83: ranging from autobiography through analyses of the underpinnings of sf to examinations of specific authors and works - delivered in thunderous yet calculated tones, and a welter of academic polysyllables. The autobiographical piece is most engaging and revealing - with Lem candidly discussing his upbringing, his Jewish heritage, the German and Russian occupations of Poland, his own sf. Elsewhere, he demonstrates his formidable intellect and his self-imposed conceptual limitations: he finds fiction without intellectual challenge boring (and has no patience with the notion of fiction as entertainment); in his view, sf works in which neither the objects nor the ideas have any basis in reality are merely "empty games." Later, however, Lem cogently discusses sf's various time-travel motifs - notwithstanding his previous denunciation of "empty games" where "impossible time-travel machines are used to point out impossible time-travel paradoxes." "The primary unsolved problem" of sf, he writes, is "the lack of a theoretical typology of its paradigmatic structures" - yet he fails to demonstrate why this lack is so damaging. On the incestuous nature of Western sf, he's devastating: "critiques are not produced independently, but are written by either the authors or the editors of anthologies, who evaluate each other's works." (He also blasts publishers and editors for camouflaging advertising as criticism.) For all these reasons, sf is trashy and apt to remain so. Moving on to specifics, Lem shows himself to be a penetrating but often arbitrary and petulant critic. Just about the only Western sf author he approves of (Ballard and Bradbury rate a maybe) is Philip K. Dick - who "tries to probe the neglected, latent, untouched, as-yet-unrealized potentialities of human existence." A. E. van Vogt's work is condemned as "stupid lies" without a shred of evidence or analysis; Borges, Lem determines, "has suffered from a lack of a free and rich imagination." He criticizes Daniel Keyes' *Flowers for Algernon* for what Leto thinks Keyes' should have written; the Strugatsky brothers' *Roadside Picnic* - which Leto not only analyzes brilliantly, but finds enjoyable - comes in for similar treatment. Clearly, there's some ax-grinding going on. In sum: guaranteed to offend and provoke. (*Kirkus Reviews*)

About the Author

Stanislaw Lem is the most widely translated and best known science fiction author writing outside of the English language. Winner of the Kafka Prize, he is a contributor to many magazines, including the *New Yorker*, and he is the author of numerous works, including *Solaris*.

Users Review

From reader reviews:

Leonard Dail:

Nowadays reading books be than want or need but also work as a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with education books but if you want experience happy read one together with theme for entertaining for instance comic or novel. Typically the *Microworlds* is kind of reserve which is giving the reader erratic experience.

Dione Wicker:

Precisely why? Because this Microworlds is an unordinary book that the inside of the book waiting for you to snap the idea but latter it will zap you with the secret the idea inside. Reading this book close to it was fantastic author who all write the book in such incredible way makes the content inside of easier to understand, entertaining method but still convey the meaning fully. So , it is good for you because of not hesitating having this any more or you going to regret it. This unique book will give you a lot of advantages than the other book have such as help improving your talent and your critical thinking method. So , still want to postpone having that book? If I have been you I will go to the guide store hurriedly.

Tracy Zapata:

Reading a book to be new life style in this year; every people loves to study a book. When you read a book you can get a great deal of benefit. When you read textbooks, you can improve your knowledge, because book has a lot of information onto it. The information that you will get depend on what kinds of book that you have read. If you wish to get information about your research, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, these us novel, comics, along with soon. The Microworlds provide you with new experience in looking at a book.

Bruce Jackson:

As we know that book is important thing to add our understanding for everything. By a book we can know everything we really wish for. A book is a group of written, printed, illustrated or perhaps blank sheet. Every year was exactly added. This publication Microworlds was filled about science. Spend your spare time to add your knowledge about your science competence. Some people has distinct feel when they reading some sort of book. If you know how big selling point of a book, you can feel enjoy to read a guide. In the modern era like now, many ways to get book which you wanted.
