## Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses) By Airlie Chapman

This thesis analyzes and explores the design of controlled networked dynamic systems - dubbed semi-autonomous networks. The work approaches the problem of effective control of semi-autonomous networks from three fronts: protocols which are run on individual agents in the network; the network interconnection topology design; and efficient modeling of these often large-scale networks. The author extended the popular consensus protocol to advection and nonlinear consensus. The network redesign algorithms are supported by a game-theoretic and an online learning regret analysis.

### **Editorial Review**

From the Back Cover

This thesis analyzes and explores the design of controlled networked dynamic systems - dubbed semi-autonomous networks. The work approaches the problem of effective control of semi-autonomous networks from three fronts: protocols which are run on individual agents in the network; the network interconnection topology design; and efficient modeling of these often large-scale networks. The author extended the popular consensus protocol to advection and nonlinear consensus. The network redesign algorithms are supported by a game-theoretic and an online learning regret analysis.

About the Author

**Airlie Chapman** received the Ph.D. degree from the William E. Boeing Aeronautics and Astronautics Department at the University of Washington, Seattle in 2013 and was simultaneously awarded the M.S. degree in mathematics. She received the B.S. degree in aeronautical (space) engineering and the M.S. degree in engineering research from the University of Sydney, Australia, in 2006 and 2008, respectively. She is currently a postdoctoral fellow at the University of Washington, Seattle. Dr. Chapman was awarded the College of Engineering Dean's Fellowship at the University of Washington and is a two-time recipient of the Amelia Earhart Fellowship. Her research interests are networked dynamic systems and graph theory with applications to robotics and aerospace systems.

### **Users Review**

**From reader reviews:**

**Brenda Gregg:**

Hey guys, do you would like to finds a new book to learn? May be the book with the title Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses) suitable to you? The actual book was written by renowned writer in this era. The book untitled Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses)is one of several books that everyone read now. This book was inspired lots of people in the world. When you read this publication you will enter the new age that you ever know just before. The author explained their idea in the simple way, so all of people can easily to know the core of this e-book. This book will give you a lot of information about this world now. In order to see the represented of the world with this book.

**Dallas Richardson:**

You could spend your free time to learn this book this reserve. This Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses) is simple to develop you can read it in the recreation area, in the beach, train along with soon. If you did not have got much space to bring often the printed book, you can buy typically the e-book. It is make you much easier to read it. You can save the book in your smart phone. Consequently there are a lot of benefits that you will get when you buy this book.

**William Evans:**

Many people spending their time frame by playing outside using friends, fun activity with family or just watching TV 24 hours a day. You can have new activity to shell out your whole day by reading a book. Ugh, do you consider reading a book can really hard because you have to bring the book everywhere? It okay you can have the e-book, delivering everywhere you want in your Cell phone. Like Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses) which is finding the e-book version. So , why not try out this book? Let's notice.

**Virginia Johnson:**

Don't be worry when you are afraid that this book can filled the space in your house, you can have it in e-book approach, more simple and reachable. That Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses) can give you a lot of friends because by you checking out this one book you have point that they don't and make you actually more like an interesting person. This kind of book can be one of one step for you to get success. This guide offer you information that probably your friend doesn't understand, by knowing more than various other make you to be great men and women. So , why hesitate? Let us have Semi-Autonomous Networks: Effective Control of Networked Systems through Protocols, Design, and Modeling (Springer Theses).
