### The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 From Springer

This book is a collection of ISRM suggested methods for testing or measuring properties of rocks and rock masses both in the laboratory and in situ, as well as for monitoring the performance of rock engineering structures. The first collection (Yellow Book) has been published in 1981. In order to provide access to all the Suggested Methods in one volume, the ISRM Blue Book was published in 2007 (by the ISRM via the Turkish National Group) and contains the complete set of Suggested Methods from 1974 to 2006 inclusive. The papers in this most recent volume have been published during the last seven years in international journals, mainly in Rock Mechanics and Rock Engineering. They offer guidance for rock characterization procedures and laboratory and field testing and monitoring in rock engineering. These methods provide a definitive procedure for the identification, measurement and evaluation of one or more qualities, characteristics or properties of rocks or rock systems that produces a test result.

Information is provisions for individuals to get better life, information nowadays can get by anyone in everywhere. The information can be a knowledge or any news even an issue. What people must be consider when those information which is inside the former life are difficult to be find than now is taking seriously which one is acceptable to believe or which one typically the resource are convinced. If you receive the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen inside you if you take *The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014* as the daily resource information.

##### **Fernando Gallimore:**

Spent a free a chance to be fun activity to do! A lot of people spent their sparetime with their family, or their friends. Usually they doing activity like watching television, going to beach, or picnic from the park. They actually doing same thing every week. Do you feel it? Do you need to something different to fill your free time/ holiday? Can be reading a book might be option to fill your totally free time/ holiday. The first thing

that you will ask may be what kinds of publication that you should read. If you want to try out look for book, may be the publication untitled The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 can be good book to read. May be it may be best activity to you.

**Brooks Davis:**

The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 can be one of your beginner books that are good idea. Most of us recommend that straight away because this reserve has good vocabulary that will increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort to get every word into enjoyment arrangement in writing The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 nevertheless doesn't forget the main level, giving the reader the hottest and based confirm resource information that maybe you can be one among it. This great information can easily drawn you into new stage of crucial thinking.

**Larry Luis:**

This The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 is great publication for you because the content which can be full of information for you who all always deal with world and still have to make decision every minute. This specific book reveal it details accurately using great arrange word or we can state no rambling sentences in it. So if you are read this hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but tricky core information with beautiful delivering sentences. Having The ISRM Suggested Methods for Rock Characterization, Testing and Monitoring: 2007-2014 in your hand like getting the world in your arm, info in it is not ridiculous one particular. We can say that no guide that offer you world within ten or fifteen minute right but this guide already do that. So , this is certainly good reading book. Hi Mr. and Mrs. active do you still doubt that?
