Human Anatomy: Laboratory Guide and Dissection Manual, 4th Edition By Michael J. Timmons, Ralph T. Hutchings

This manual combines the features of a traditional anatomy laboratory manual with those of a dissection manual and an anatomical atlas. Superb photos and illustrations are supplemented with observation instructions for a wide variety of specimens including cats, cadavers, isolated organs, histology slides and models. Exercises include review questions, labeling, coloring, and drawing. A 132 color plate folio of labeled cadaver specimen and anatomical model photos is a distinguishing feature of this laboratory guide. While the manual provides references to the Martini/Timmons/Tallitsch, Human Anatomy Fourth Edition textbook, it can be used with any anatomy textbook.
