**Data Manipulation with R - Second Edition** By Jaynal Abedin, Kishor Kumar Das

**Efficiently perform data manipulation using the split-apply-combine strategy in R**

## About This Book

- Perform data manipulation with add-on packages such as plyr, reshape, stringr, lubridate, and sqldf
- Learn about factor manipulation, string processing, and text manipulation techniques using the stringr and dplyr libraries
- Enhance your analytical skills in an intuitive way through step-by-step working examples

## Who This Book Is For

This book is for all those who wish to learn about data manipulation from scratch and excel at aggregating data effectively. It is expected that you have basic knowledge of R and have previously done some basic administration work with R.

## What You Will Learn

- Learn about R data types and their basic operations
- Work efficiently with string, factor, and date variables using stringr
- Understand group-wise data manipulation
- Work with different layouts of R datasets and interchange between layouts for varied purposes
- Manage bigger datasets using plyr and dplyr
- Perform data manipulation with add-on packages such as plyr, reshape, stringr, lubridate, and sqldf
- Manipulate datasets using SQL statements with the sqldf package
- Clean and structure raw data for data mining using text manipulation

## In Detail

This book starts with the installation of R and how to go about using R and its libraries. We then discuss the mode of R objects and its classes and then highlight different R data types with their basic operations.

The primary focus on group-wise data manipulation with the split-apply-combine strategy has been explained with specific examples. The book also contains coverage of some specific libraries such as lubridate, reshape2, plyr, dplyr, stringr, and sqldf. You will not only learn about group-wise data manipulation, but also learn how to efficiently handle date, string, and factor variables along with different layouts of datasets using the reshape2 package.

By the end of this book, you will have learned about text manipulation using stringr, how to extract data from twitter using twitterR library, how to clean raw data, and how to structure your raw data for data mining.

## **Editorial Review**

About the Author

### **Jaynal Abedin**

Jaynal Abedin currently holds the position of senior statistician at the Centre for Communicable Diseases (CCD) at the International Centre for Diarrhoeal Disease Research, Bangladesh (<http://www.icddr.org/>). He attained his bachelor's and master's degrees in statistics from the University of Rajshahi, Bangladesh. He has extensive experience in R programming and Stata, and has good leadership qualities. He has contributed to two books on R and also developed an R package named edeR, short for e-mail data extraction using R, which is available at CRAN (<http://cran.rproject.org/web/packages/edeR/index.html>). He is currently leading a team of statisticians. He has hands-on experience in developing training material and facilitating training in R programming and Stata, along with statistical aspects in public health research. His primary areas of interest in research include causal inference and machine learning. He is currently involved in several ongoing public health research projects, and is a coauthor of nine peer-reviewed scientific papers. Moreover, he is involved in several work-in-progress manuscripts. He works as a freelance statistician in online marketplaces and has obtained a good reputation for his work.

### **Kishor Kumar Das**

Kishor Kumar Das is a statistician at the International Centre for Diarrhoeal Disease Research, Bangladesh, an internationally recognized organization that focuses mainly on public health research. He completed his MSc and BSc in applied statistics from the Institute of Statistical Research and Training, University of Dhaka, Bangladesh. He has extensively used R for data processing, statistical analysis, and graphs for more than 10 years. His research interests are survival analysis, machine learning, and statistical computing.

## **Users Review**

**From reader reviews:**

### **Lucille Renner:**

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Aim to pick one book that you find out the inside because don't determine book by its protect may doesn't work is difficult job because you are frightened that the inside maybe not seeing that fantastic as in the outside appear likes. Maybe you answer is usually Data Manipulation with R - Second Edition why because the wonderful cover that make you consider in regards to the content will not disappoint you actually. The inside or content will be fantastic as the outside as well as cover. Your reading 6th sense will directly show you to pick up this book.

**Diana Saffold:**

Are you kind of hectic person, only have 10 or maybe 15 minute in your day to upgrading your mind talent or thinking skill actually analytical thinking? Then you are having problem with the book in comparison with can satisfy your small amount of time to read it because this time you only find reserve that need more time to be learn. Data Manipulation with R - Second Edition can be your answer since it can be read by an individual who have those short extra time problems.

**Mark Clark:**

This Data Manipulation with R - Second Edition is brand new way for you who has interest to look for some information mainly because it relief your hunger of information. Getting deeper you on it getting knowledge more you know or you who still having little bit of digest in reading this Data Manipulation with R - Second Edition can be the light food for you personally because the information inside this particular book is easy to get by simply anyone. These books develop itself in the form which can be reachable by anyone, sure I mean in the e-book web form. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there is absolutely no in reading a reserve especially this one. You can find what you are looking for. It should be here for you. So , don't miss this! Just read this e-book sort for your better life and knowledge.

**Leon King:**

Do you like reading a e-book? Confuse to looking for your best book? Or your book ended up being rare? Why so many problem for the book? But any kind of people feel that they enjoy regarding reading. Some people likes examining, not only science book but in addition novel and Data Manipulation with R - Second Edition or even others sources were given understanding for you. After you know how the truly great a book, you feel desire to read more and more. Science book was created for teacher or even students especially. Those guides are helping them to add their knowledge. In other case, beside science reserve, any other book likes Data Manipulation with R - Second Edition to make your spare time much more colorful. Many types of book like this one.
