Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization By Christopher Knight, Robert Lomas

Modern scientific investigations show that Earth has been hit many times by objects such as comets and meteorites. Laboratory work on comet impact effects demonstrates that comets could cause tidal waves to exceed three miles tall and near 400 miles per hour. In the last 10,000 years, there have been two impacts of such proportion: a seven-fold impact into all the world's oceans around 7640 B.C., and a single impact into the Mediterranean Sea about 3150 B.C., the time of Noah's Flood.

Uriel's Machine proves ancient Europeans not only survived the 7640 B.C. flood, but developed a highly advanced civilization dedicated to predicting and preparing for future meteoric impacts. Building an international network of sophisticated astronomical observatories, these ancient astronomers created accurate solar, lunar, and planetary calendars, measured the diameter of the Earth, and precisely predicted comet collisions years in advance. This was the true purpose of megalithic structures such as Stonehenge. In 3150 B.C., the ancients' predictions proved true, and their device -- Uriel's Machine -- allowed the reconstruction of civilization in a shattered world.

Uriel's Machine also presents evidence that:

- There was a single global language on Earth
- A single female was a common ancestor to all living humans
- Angels bred with human women to create The Watchers, giant half-human beings
- The oral tradition of Freemasonry records real events

A fascinating study of humankind's past, present, and future, Uriel's Machine proves the world was indeed flooded, but survived wholly due to these ancient Europeans, their heavenly knowledge, and one remarkable machine.

Editorial Review

Amazon.com Review

The last few years have seen literally dozens of books challenging our beliefs about history and archaeology, each of them seeking to show that the past was quite different from what standard books tell us. With *Uriel's Machine*, Christopher Knight and Robert Lomas move away from their previous books about the Knights Templar, the Freemasons, and the strange chapel at Rosslyn in Scotland, and turn their attention instead to the much more distant past. The authors believe that Earth was hit by a comet in 7640 B.C., and by another one in 3150 B.C., each time resulting in great devastation. From their study of Stone Age monuments around Britain, and of the nonbiblical Book of Enoch, they conclude that Enoch visited Britain some time before 3150 B.C. to learn how to construct a megalithic celestial calculator that, amongst other things, could be used to forecast the arrival of comets. In the end, of course, there can be no absolute proof of this or any other rewriting of history--or indeed of more orthodox versions of history. Knight and Lomas's conclusions are controversial, but that in itself is no bad thing. Existing paradigms in every discipline should be challenged, and this is what they are doing. --David V. Barrett, *Amazon.co.uk*

About the Author

Christopher Knight has a degree in advertising and graphic design and is the managing director of a marketing and advertising agency. In 1976 he became a Freemason.

Robert Lomas is the co-author of *The Hiram Key*, *The Second Messiah*, and *Uriel's Machine*. A Freemason, he lectures at Bradford University in England.

Prologue:

In the course of researching our last two books, we discovered that many standard explanations of historical events are little more than conventions assembled from limited information. We also found that there are veins of information about the past held within obscure texts such as the peculiar rituals of Freemasonry, some of which contain arcane knowledge of events over a vast period of time.

As Freemasons, we have assembled all of the available evidence within these rituals and found that they tell the story of the Jewish leaders from the biblical Flood down to the period of the Knights Templar. These old rituals make frequent reference to a worldwide Flood, and even today there is an entire order dedicated to preserving a verbal tradition about Noah, the builder of the Biblical Ark who survived the deluge, and his grandfather Enoch. There are lists of characters from the pre-Flood civilization such as Tubal-Cain who, Masons are told, invented agriculture and the ploughshare. The earlier rituals of the Ancient Scottish Rite of Freemasonry have not been in general use since 1813, when they had entire degrees devoted to Enoch, who was told by an angel called Uriel that he must preserve the secrets of civilization because a global disaster was imminent.

Masonic documents dating from the early 17th century, known as the Old Charges, tell how everything dear to mankind existed before the disastrous Flood and had to be reconstructed by the survivors. This is the same world-engulfing flood that biblical and Babylonian sources claim occurred at some point long before writing was invented.

Having discovered that the oral traditions of Freemasonry are the unwitting repository of so much accurate information of the past, we wondered if the idea of a global flood could be more than a legend. This spurred us to look into what is known of prehistory, and we were pleased to find that some of the greatest scholars in this area have already found what we discovered — that existing ideas are largely wrong. Professor Cohn Renfrew, Disney Professor of Archaeology at Cambridge University, expressed it perfectly when he said, “The study of prehistory today is in a state of crisis.”

To commence our new research, we posed ourselves three big questions:

1. Is it physically possible for the entire world to flood; and if so, what evidence is there that such a terrible thing has happened within human racial memory?
2. The oral traditions of Freemasonry claim that there was an advanced civilization before the coming of the Flood. Are these accounts just myth, or do they record a memory of a lost people?
3. Could all of this help us to construct a new paradigm of prehistory?

Perhaps we would never have started this complex mission, but for two things: The suggestion of leading geologist Dr Jack Miller of Cambridge University that a world flood is very possible; and the problems that Jupiter experienced in 1994.

Users Review

From reader reviews:

Cornelius Callaghan:

Book is to be different for each grade. Book for children till adult are different content. As you may know that book is very important for people. The book Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization ended up being making you to know about other information and of course you can take more information. It is extremely advantages for you. The e-book Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization is not only giving you far more new information but also being your friend when you truly feel bored. You can spend your personal spend time to read your publication. Try to make relationship with all the book Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization. You never really feel lose out for everything when you read some books.

Horace Godbolt:

The book untitled Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization is the book that recommended to you you just read. You can see the quality of the e-book content that will be shown to a person. The language that article author use to explained their way of doing something is easily to understand. The article author was did a lot of investigation when write the book, so the information that they share to you personally is absolutely accurate. You also could possibly get the e-book of Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization from the publisher to make you a lot more enjoy free time.

Bridget Carter:

Often the book Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization has a lot of knowledge on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. Mcdougal makes some research before write this book. This kind of book very easy to read you can obtain the point easily after perusing this book.

Robert Banks:

Is it a person who having spare time subsequently spend it whole day simply by watching television programs or just resting on the bed? Do you need something new? This Uriel's Machine: Uncovering the Secrets of Stonehenge, Noah's Flood and the Dawn of Civilization can be the reply, oh how comes? It's a book you know. You are and so out of date, spending your time by reading in this brand new era is common not a nerd activity. So what these textbooks have than the others?
