### Working with ANSYS A Tutorial Approach By Divya Zindani, Apurba Kumar Roy, Kaushik Kumar

The essence of this book is the innovative approach used to learn ANSYS software by imitation, i.e. using the examples provided in this book. The primary aim of this book is to assist in learning the use of the ANSYS software through examples taken from various areas of engineering. An attempt has been made to provide the readers with a comprehensive cross section of analysis types, in order to provide a broad choice of examples to be imitated in one's own work. This book is exclusively structured around ANSYS, and no other finite element (FE) software currently available is considered. The book is divided into four sections. Section I introduces the readers to the brief overview of ANSYS. Section II deals with the APDL part of ANSYS. Section III concentrates on ANSYS using Workbench. It contains tutorials on problems solved using Workbench. Section IV deals with cases of CFD / CFX problems solved using ANSYS. Chapter 20 provides a brief overview of ANSYS CFX. Chapter 21 consists of illustrations to help users use the CFX part of ANSYS in a hassle-free manner. Salient Features: Provides a variety of solved problems using APDL. The non-linear structural analysis part is explained with real-life examples. A chapter on Composites, which in recent times have been used extensively in aircraft structures, automobiles, sporting goods, and many consumer products, is dealt with. The text is well supported by illustrations for a more clear understanding of all the sections of ANSYS.

## **Editorial Review**

### About the Author

Divya Zindani, (BE, Mechanical Engineering, Rajasthan Technical University, Kota), presently pursuing M.E. (Design of Mechanical Equipment, BIT Mesra). He has over 2 years of Industrial experience. His areas of interest are optimization, product and process design, CAD/CAM/CAE and rapid prototyping. He has 1 patent, 5 international journal and 4 international conference publications to his credit. Apurba Kumar Roy, B. E. (Mechanical Engineering, REC (Now NIT), Jaipur), M.E. (Mechanical Engineering, Jadavpur University, Kolkata) and PhD (Engineering IIT Kharagpur), is an Associate Professor at the Department of Mechanical Engineering, Birla Institute of Technology, Mesra, Ranchi, India. He has over 27 years of teaching, research and industrial experience. His areas of interest are Fluid Dynamics, Turbo machines, Multiphase Flow, CFD, Optimization and Non-conventional Energy, Direct Energy Conversion. He has 1 book chapter, 27 international journal, 5 international and 15 national conference publications to his credit. He is on the editorial board and review panel of 1 international journal of repute. Kaushik Kumar, B.Tech (Mechanical Engineering, REC (Now NIT), Warangal), MBA (Marketing, IGNOU) and Ph.D (Engineering, Jadavpur University), is presently an Associate Professor in the Department of Mechanical Engineering, Birla Institute of Technology, Mesra, Ranchi, India. He has 14 years of teaching & research and over 11 years of industrial experience in a manufacturing unit of global repute. His areas of teaching and research interest are CAD / CAM, Quality Management Systems, Optimization, Non-conventional Machining, Rapid Prototyping and Composites. He has 9 patents, 2 books, 8 book chapters, 96 international journal publications, 18 international and 8 national conference publications to his credit. He is on the editorial board and review panel of 8 international and 1 national journal of repute. He has been felicitated with many awards and honours.

## **Users Review**

### **From reader reviews:**

#### **John Wannamaker:**

This book untitled Working with ANSYS A Tutorial Approach to be one of several books which best seller in this year, that's because when you read this guide you can get a lot of benefit in it. You will easily to buy this kind of book in the book retail store or you can order it via online. The publisher in this book sells the e-book too. It makes you quickly to read this book, since you can read this book in your Smartphone. So there is no reason to you personally to past this reserve from your list.

#### **Elmer Dooley:**

Reading a book tends to be new life style on this era globalization. With studying you can get a lot of information which will give you benefit in your life. Along with book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their reader with their story or perhaps their experience. Not only the storyplot that share in the textbooks. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your children, there are many kinds of book that exist now. The authors on earth always try to improve their ability in writing, they also doing some analysis before they write to the book. One of them is this Working with ANSYS A Tutorial Approach.

**David George:**

The particular book Working with ANSYS A Tutorial Approach has a lot of knowledge on it. So when you make sure to read this book you can get a lot of help. The book was compiled by the very famous author. Tom makes some research prior to write this book. This book very easy to read you can get the point easily after looking over this book.

**Johnny Sutton:**

Are you kind of active person, only have 10 or perhaps 15 minute in your day to upgrading your mind expertise or thinking skill perhaps analytical thinking? Then you are having problem with the book when compared with can satisfy your short space of time to read it because pretty much everything time you only find book that need more time to be examine. Working with ANSYS A Tutorial Approach can be your answer mainly because it can be read by anyone who have those short spare time problems.
