Architectural Research Methods By Linda N. Groat, David Wang

A practical guide to research-just for architects

From searching for the best glass to prevent glare to determining how clients might react to color choice for restaurant walls, research is a crucial tool that architects must master in order to effectively address the technical, aesthetic, and behavioral issues that arise in their work.

This book's unique coverage of research methods is specifically targeted to help professional designers and researchers better conduct and understand research.

Part I explores basic research issues and concepts, and includes chapters on relating theory to method and design to research. Part II gives a comprehensive treatment of specific strategies for investigating built forms. In all, the book covers seven types of research, including historical, qualitative, correlational, experimental, simulation and modeling, logical argumentation, and case study and mixed methods.

Complete with real-life examples of how good research can be used from project inception to completion, Architectural Research Methods is an essential reference for architecture students and researchers as well as architects, interior designers, landscape architects, and building product manufacturers.

Users Review

From reader reviews:

Jose Longoria:

Do you have favorite book? When you have, what is your favorite's book? Reserve is very important thing for us to understand everything in the world. Each reserve has different aim or even goal; it means that publication has different type. Some people sense enjoy to spend their a chance to read a book. They are really reading whatever they take because their hobby will be reading a book. What about the person who don't like reading a book? Sometime, particular person feel need book if they found difficult problem or perhaps exercise. Well, probably you will need this *Architectural Research Methods*.

Beverly Brown:

Nowadays reading books become more than want or need but also become a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge even the information inside the book this improve your knowledge and information. The info you get based on what kind of book you read, if you want send more knowledge just go with training books but if you want sense happy read one together with theme for entertaining for example comic or novel. The particular *Architectural Research Methods* is

kind of publication which is giving the reader unstable experience.

Malcolm Lee:

You can spend your free time you just read this book this book. This Architectural Research Methods is simple to develop you can read it in the park, in the beach, train as well as soon. If you did not include much space to bring the actual printed book, you can buy the actual e-book. It is make you much easier to read it. You can save typically the book in your smart phone. So there are a lot of benefits that you will get when one buys this book.

Shelley Gavin:

Many people spending their moment by playing outside having friends, fun activity with family or just watching TV the whole day. You can have new activity to invest your whole day by reading a book. Ugh, do you consider reading a book really can hard because you have to take the book everywhere? It fine you can have the e-book, taking everywhere you want in your Smart phone. Like Architectural Research Methods which is finding the e-book version. So , why not try out this book? Let's view.
