**Boundary Conformal Field Theory and the Worldsheet Approach to D-Branes (Cambridge Monographs on Mathematical Physics)** By Andreas Recknagel, Volker Schomerus

Boundary conformal field theory is concerned with a class of two-dimensional quantum field theories which display a rich mathematical structure and have many applications ranging from string theory to condensed matter physics. In particular, the framework allows discussion of strings and branes directly at the quantum level. Written by internationally renowned experts, this comprehensive introduction to boundary conformal field theory reaches from theoretical foundations to recent developments, with an emphasis on the algebraic treatment of string backgrounds. Topics covered include basic concepts in conformal field theory with and without boundaries, the mathematical description of strings and D-branes, and the geometry of strongly curved spacetime. The book offers insights into string geometry that go beyond classical notions. Describing the theory from basic concepts, and providing numerous worked examples from conformal field theory and string theory, this reference is of interest to graduate students and researchers in physics and mathematics.

About the Author

Andreas Recknagel is a member of staff at the Department of Mathematics, King's College London. His research centers on quantum field theory in two dimensions, in particular conformal field theories and their applications to strings and branes. He is also interested in topological field theory and the relation of non-commutative geometry to quantum field theory.

Volker Schomerus is a professor and scientist at the Theory Group of DESY, Hamburg. He has worked intensively in quantum field theory, symmetries in physics, non-commutative geometry and string theory, for which he has received several distinctions. He serves on the editorial board of several prestigious journals.

**From reader reviews:**

**Beverly McKeever:**

This book untitled Boundary Conformal Field Theory and the Worldsheet Approach to D-Branes (Cambridge Monographs on Mathematical Physics) to be one of several books this best seller in this year, honestly, that is because when you read this reserve you can get a lot of benefit upon it. You will easily to buy this specific book in the book retailer or you can order it via online. The publisher of the book sells the e-book too. It makes you quicker to read this book, since you can read this book in your Smartphone. So there is no reason for you to past this reserve from your list.

**Harry Keller:**

A lot of people always spent their very own free time to vacation or go to the outside with them family or their friend. Are you aware? Many a lot of people spent they will free time just watching TV, or playing video games all day long. If you wish to try to find a new activity that is look different you can read some sort of book. It is really fun to suit your needs. If you enjoy the book that you just read you can spent all day long to reading a guide. The book Boundary Conformal Field Theory and the Worldsheet Approach to D-Branes (Cambridge Monographs on Mathematical Physics) it is very good to read. There are a lot of those who recommended this book. These people were enjoying reading this book. If you did not have enough space to bring this book you can buy the e-book. You can m0ore effortlessly to read this book from your smart phone. The price is not too expensive but this book features high quality.

**Ronda Tollison:**

In this age globalization it is important to someone to acquire information. The information will make you to

definitely understand the condition of the world. The fitness of the world makes the information easier to share. You can find a lot of personal references to get information example: internet, paper, book, and soon. You will observe that now, a lot of publisher that print many kinds of book. Often the book that recommended to your account is Boundary Conformal Field Theory and the Worldsheet Approach to D-Branes (Cambridge Monographs on Mathematical Physics) this publication consist a lot of the information with the condition of this world now. That book was represented how do the world has grown up. The vocabulary styles that writer make usage of to explain it is easy to understand. The particular writer made some study when he makes this book. This is why this book ideal all of you.

**Audrey Mack:**

With this era which is the greater man or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple approach to have that. What you need to do is just spending your time little but quite enough to possess a look at some books. One of many books in the top checklist in your reading list is Boundary Conformal Field Theory and the Worldsheet Approach to D-Branes (Cambridge Monographs on Mathematical Physics). This book which can be qualified as The Hungry Hills can get you closer in becoming precious person. By looking way up and review this book you can get many advantages.
