## **Editorial Review**

From the Back Cover

***Human Behavior and the Larger Social Environment* promotes critical thinking through extensive review and analysis of macro-level systems and structures, highlighting both the positive and negative impacts they have on individuals and families.**

### **Highlights of The First Edition:**

- Presents multiple perspectives in each chapter to explain each macro topic, helping students to become more adept at applying different perspectives and using critical thinking skills.
- Avoids overwhelming students by organizing each chapter the same way, helping students mentally organize material so they can readily apply the knowledge to other social work courses.
- Supports the “person-in-environment” orientation by moving away from an overemphasis on individual development, toward an examination of contextual issues that more fully demonstrate the challenges routinely encountered by social workers.

### **What reviewers are saying about *Human Behavior and the Larger Social Environment*:**

*“I cannot remember the last time that I read a textbook that was as fascinating and held my attention throughout... I predict that social work students will love this book and teachers will find students to be enthusiastic and engaged in the topic.”*

—**Deborah Valentine, Ph.D.**, Colorado State University

*“The perspectives presented such as social constructionist, ecosystems, diversity, etc. will greatly facilitate students' learning and bridge the gap between theory, practice, and multiple dimensions of the macro environment. I think that students will find this text interesting and understandable and that it will help students to critically examine the multiple dimensions of human behavior.”*

—**Marian S. Harris, Ph.D.**, University of Washington, Tacoma
