Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) By Walter Carnielli, Marcelo Esteban Coniglio

This book is the first in the field of paraconsistency to offer a comprehensive overview of the subject, including connections to other logics and applications in information processing, linguistics, reasoning and argumentation, and philosophy of science. It is recommended reading for anyone interested in the question of reasoning and argumentation in the presence of contradictions, in semantics, in the paradoxes of set theory and in the puzzling properties of negation in logic programming. Paraconsistent logic comprises a major logical theory and offers the broadest possible perspective on the debate of negation in logic and philosophy. It is a powerful tool for reasoning under contradictoriness as it investigates logic systems in which contradictory information does not lead to arbitrary conclusions. Reasoning under contradictions constitutes one of most important and creative achievements in contemporary logic, with deep roots in philosophical questions involving negation and consistency

This book offers an invaluable introduction to a topic of central importance in logic and philosophy. It discusses (i) the history of paraconsistent logic; (ii) language, negation, contradiction, consistency and inconsistency; (iii) logics of formal inconsistency (LFIs) and the main paraconsistent propositional systems; (iv) many-valued companions, possible-translations semantics and non-deterministic semantics; (v) paraconsistent modal logics; (vi) first-order paraconsistent logics; (vii) applications to information processing, databases and quantum computation; and (viii) applications to deontic paradoxes, connections to Eastern thought and to dialogical reasoning.

Editorial Review

Review

“This is a formal book focusing on logics of formal inconsistency (LFI). ... the authors focus on various issues in philosophy of science and do a great job to exhibit the breadth and depth of LFIs. ... the book is very thought-provoking, which is a great advantage of researchers. ... This book is a first step to identify, understand and explore these questions.” (Can Baskent, zbMATH 1355.03001, 2017)

From reader reviews:

Lillian Owensby:

The book Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) will bring someone to the new experience of reading the book. The author style to clarify the idea is very unique. In the event you try to find new book to read, this book very acceptable to you. The book Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) is much recommended to you to see. You can also get the e-book from official web site, so you can quickly to read the book.

Wayne Ross:

This Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) is great book for you because the content and that is full of information for you who else always deal with world and possess to make decision every minute. That book reveal it facts accurately using great organize word or we can state no rambling sentences within it. So if you are read this hurriedly you can have whole information in it. Doesn't mean it only provides you with straight forward sentences but hard core information with attractive delivering sentences. Having Paraconsistent Logic: Consistency, Contradiction and Negation (Logic, Epistemology, and the Unity of Science) in your hand like finding the world in your arm, info in it is not ridiculous a single. We can say that no guide that offer you world inside ten or fifteen second right but this reserve already do that. So , it is good reading book. Hey there Mr. and Mrs. occupied do you still doubt that will?
