**Python 3 Text Processing with NLTK 3 Cookbook** By Jacob Perkins

**Over 80 practical recipes on natural language processing techniques using Python's NLTK 3.0**

## About This Book

- Break text down into its component parts for spelling correction, feature extraction, and phrase transformation
- Learn how to do custom sentiment analysis and named entity recognition
- Work through the natural language processing concepts with simple and easy-to-follow programming recipes

## Who This Book Is For

This book is intended for Python programmers interested in learning how to do natural language processing. Maybe you've learned the limits of regular expressions the hard way, or you've realized that human language cannot be deterministically parsed like a computer language. Perhaps you have more text than you know what to do with, and need automated ways to analyze and structure that text. This Cookbook will show you how to train and use statistical language models to process text in ways that are practically impossible with standard programming tools. A basic knowledge of Python and the basic text processing concepts is expected. Some experience with regular expressions will also be helpful.

## What You Will Learn

- Tokenize text into sentences, and sentences into words
- Look up words in the WordNet dictionary
- Apply spelling correction and word replacement
- Access the built-in text corpora and create your own custom corpus
- Tag words with parts of speech
- Chunk phrases and recognize named entities
- Grammatically transform phrases and chunks
- Classify text and perform sentiment analysis

## In Detail

This book will show you the essential techniques of text and language processing. Starting with tokenization, stemming, and the WordNet dictionary, you'll progress to part-of-speech tagging, phrase chunking, and named entity recognition. You'll learn how various text corpora are organized, as well as how to create your own custom corpus. Then, you'll move onto text classification with a focus on sentiment analysis. And because NLP can be computationally expensive on large bodies of text, you'll try a few methods for distributed text processing. Finally, you'll be introduced to a number of other small but complementary Python libraries for text analysis, cleaning, and parsing.

This cookbook provides simple, straightforward examples so you can quickly learn text processing with Python and NLTK.

### Editorial Review

About the Author

#### Jacob Perkins

Jacob Perkins is the cofounder and CTO of Weotta, a local search company. Weotta uses NLP and machine learning to create powerful and easy-to-use natural language search for what to do and where to go. He is the author of Python Text Processing with NLTK 2.0 Cookbook, Packt Publishing, and has contributed a chapter to the Bad Data Handbook, O'Reilly Media. He writes about NLTK, Python, and other technology topics at <http://streamhacker.com>. To demonstrate the capabilities of NLTK and natural language processing, he developed <http://text-processing.com>, which provides simple demos and NLP APIs for commercial use. He has contributed to various open source projects, including NLTK, and created NLTK-Trainer to simplify the process of training NLTK models. For more information, visit <https://github.com/japerk/nltk-trainer>.

### Users Review

#### From reader reviews:

##### Robert Glass:

What do you regarding book? It is not important along? Or just adding material when you really need something to explain what you problem? How about your time? Or are you busy man or woman? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They should answer that question simply because just their can do this. It said that about reserve. Book is familiar on every person. Yes, it is right. Because start from on jardín de infancia until university need that Python 3 Text Processing with NLTK 3 Cookbook to read.

##### Jessica Garcia:

The reason why? Because this Python 3 Text Processing with NLTK 3 Cookbook is an unordinary book that the inside of the book waiting for you to snap this but latter it will surprise you with the secret this inside. Reading this book next to it was fantastic author who else write the book in such awesome way makes the content on the inside easier to understand, entertaining approach but still convey the meaning fully. So , it is good for you because of not hesitating having this anymore or you going to regret it. This phenomenal book will give you a lot of rewards than the other book get such as help improving your talent and your critical thinking means. So , still want to delay having that book? If I had been you I will go to the e-book store hurriedly.

##### Harry Fulford:

Reading can called mind hangout, why? Because if you are reading a book particularly book entitled Python 3 Text Processing with NLTK 3 Cookbook your brain will drift away trough every dimension, wandering in each aspect that maybe unknown for but surely will end up your mind friends. Imaging each word written in

a guide then become one contact form conclusion and explanation that will maybe you never get previous to. The Python 3 Text Processing with NLTK 3 Cookbook giving you a different experience more than blown away the mind but also giving you useful facts for your better life on this era. So now let us present to you the relaxing pattern here is your body and mind will probably be pleased when you are finished reading it, like winning an activity. Do you want to try this extraordinary spending spare time activity?

**Leonie Blazek:**

In this era globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The health of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, classifieds, book, and soon. You can observe that now, a lot of publisher that will print many kinds of book. The particular book that recommended to you is Python 3 Text Processing with NLTK 3 Cookbook this e-book consist a lot of the information on the condition of this world now. This particular book was represented how does the world has grown up. The dialect styles that writer make usage of to explain it is easy to understand. Typically the writer made some study when he makes this book. This is why this book suited all of you.
