Borland C++ Builder: The Complete Reference By Herbert Schildt, Gregory L. Guntle, Herb Schildt

C++ Builder 5 is an integrated development environment for building standalone, client/server, distributed and Internet-enabled Windows applications. This resource provides an introduction to the operation of the Intergrated Development Enviroment (IDE), the various tools, the debugger, the C++ language and libraries. It also gives coverage of the standard template library (STL) and Windows programming.

Editorial Review

From the Back Cover

The Most Comprehensive Guide to Borland C++ Builder

Learn to build high-powered applications quickly and easily with help from this in-depth guide. Inside you'll find comprehensive coverage of the entire C++ language *and* the C++ Builder integrated development environment (IDE). This incomparable reference is divided into four parts, and organized by topic. Part One covers the foundation of C++, including its control statements, operators, preprocessor directives, and data types. Part Two details the extensive C++ Builder library. In Part Three you will explore object-oriented programming (OOP), learn about classes and objects, constructors, destructors, polymorphism, inheritance, exception handling, templates, and much more. Also, you'll get details on the standard template library (STL), one of C++'s most powerful, advanced features. Part Four covers the C++ Builder IDE, and explains how to create, compile, and run applications -- and how to fix bugs using the debugger. And, numerous ready-to-run examples are included throughout, making it easy to apply what you've learned.

- Master the C++ language and its libraries -- including the numerous extensions added by C++ Builder
- Learn the fundamental principles of OOP -- polymorphism, inheritance, and encapsulation
- Explore classes, objects, constructors, and destructors
- Get details on arrays, pointers, and references -- three of C++'s most important constructs
- Understand functions and operator overloading
- Use virtual functions and runtime type ID (RTTI)
- Apply templates, namespaces, and exception handling
- Learn about the C++ I/O system, including its classes, functions, and operators
- Use mathematical, time-, date-, and system-related functions

About the Author

Herb Schildt (Mahomet, IL) is a leading authority on C and C++ and a best-selling author whose books have sold more than 2 million copies. His acclaimed C and C++ books include Teach Yourself C, C++ from the Ground Up, C++: The Complete Reference, Java Programmer's Reference, STL Programming from the Ground Up, Windows 98 Programming from the Ground Up, and co-author of C/C++ Annotated Archives.

Greg Guntle (Brownsburg, IN) has been working on and programming PCs for the last 20 years. He has also been providing technical editing skills for numerous computer-related subjects for the past 15 years.

Users Review

From reader reviews:

George Harvey:

Book is to be different for each grade. Book for children right up until adult are different content. We all know that that book is very important for us. The book Borland C++ Builder: The Complete Reference has been making you to know about other understanding and of course you can take more information. It is rather advantages for you. The reserve Borland C++ Builder: The Complete Reference is not only giving you much more new information but also for being your friend when you experience bored. You can spend your own spend time to read your e-book. Try to make relationship while using book Borland C++ Builder: The

Complete Reference. You never feel lose out for everything if you read some books.

Santa McNabb:

As people who live in typically the modest era should be revise about what going on or facts even knowledge to make these individuals keep up with the era which can be always change and move forward. Some of you maybe will update themselves by reading through books. It is a good choice to suit your needs but the problems coming to you actually is you don't know which one you should start with. This Borland C++ Builder: The Complete Reference is our recommendation to make you keep up with the world. Why, as this book serves what you want and wish in this era.

Leesa Banta:

Why? Because this Borland C++ Builder: The Complete Reference is an unordinary book that the inside of the reserve waiting for you to snap the idea but latter it will shock you with the secret the idea inside. Reading this book adjacent to it was fantastic author who have write the book in such awesome way makes the content on the inside easier to understand, entertaining technique but still convey the meaning fully. So , it is good for you for not hesitating having this any more or you going to regret it. This amazing book will give you a lot of positive aspects than the other book have got such as help improving your talent and your critical thinking approach. So , still want to hold off having that book? If I had been you I will go to the guide store hurriedly.

April Hanson:

As a student exactly feel bored to be able to reading. If their teacher questioned them to go to the library in order to make summary for some guide, they are complained. Just very little students that has reading's heart or real their leisure activity. They just do what the professor want, like asked to the library. They go to generally there but nothing reading significantly. Any students feel that examining is not important, boring as well as can't see colorful photos on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this time, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Borland C++ Builder: The Complete Reference can make you sense more interested to read.
