## **Editorial Review**

Review

"The book discusses the pathophysiology of disease processes in neonatal/perinatal medicine, stressing evidence-based management strategies. The target audience is neonatal physicians, fellows, and neonatal nurse practitioners. Anyone who spends time caring for critically ill infants would appreciate and benefit from this book. This is an outstanding edition of an already accepted core textbook in neonatology. It is aesthetically appealing, and the authors do not disappoint with their content. With this ever-changing field, the updated edition is a welcome resource for any practicing neonatologist." - Matthew Cortez, MD (Ochsner Clinic Foundation), Excerpts from Doody's review service, Rating - 4 Stars!
