Manual Therapy in Children, 1e By Heiner Biedermann PhD

Manual Therapy in Children presents a comprehensive conceptual approach to the subject of manual therapy for children of different ages. This approach considers the relationship between the neuromusculoskeletal structure and function at different stages of development and places strong emphasis on the prevention of problems as the child develops as well as on their safe and effective treatment and management.

- Presents a fresh, evidence-based approach to the management of a wide range of pediatric problems
- Features approximately 250 high quality illustrations that clarify key points
- The Basics summarizes essential theoretical information such as anatomy and physiology, neuromotor development of the first 5 years ? crawling to walking, and surface anatomy
- Clinical Insights looks at issues which may affect the neuromotor development of the child and offers management approaches including birthing interventions, birth trauma, differential diagnosis of central and peripheral neurological disorders, and asymmetry
- Practical Aspects of Manual Therapy in Children includes advice on communicating with parents and children; guidance for examination and treatment; and considerations for treating different joints and spinal regions
- Radiology in Manual Therapy describes the functional radiology of the spine in the young child and how to take, interpret, and document radiographs in infants and young children.
- Making Sense of It All outlines the clinical picture including functional disorders (such as KiSS syndrome), neurological and biomechanical disorders, and the long-term consequences of untreated functional disorders in the first year
- Other topics include therapy for children with CP, hydrocephalus, radiological monuments of cervical stress, ADD (attention deficit disorder), POS (psycho-organic syndrome), MCD (minimal cerebral damage), and hereditary predisposition

Editorial Review

Review

Chiropractic Journal of Australia, December 2004

"An extraordinarily interesting book. There is a remarkable amount of empirical experience and many valuable lessons to be learned from experienced clinical practitioners, and this book is a very good collection of such material, as it relates to cervical spine dysfunction in neonates and children. All in all this is a wonderful work of strong clinical relevance, and if you treat children you really must read this book."

Users Review

From reader reviews:

Ruth McMillian:

Nowadays reading books are more than want or need but also work as a life style. This reading addiction give you lot of advantages. The benefits you got of course the knowledge even the information inside the book which improve your knowledge and information. The info you get based on what kind of e-book you read, if you want have more knowledge just go with education and learning books but if you want feel happy read one along with theme for entertaining for instance comic or novel. The actual Manual Therapy in Children, 1e is kind of e-book which is giving the reader unstable experience.

Edward Shaw:

Your reading sixth sense will not betray anyone, why because this Manual Therapy in Children, 1e reserve written by well-known writer whose to say well how to make book which might be understand by anyone who have read the book. Written in good manner for you, still dripping wet every ideas and writing skill only for eliminate your own personal hunger then you still hesitation Manual Therapy in Children, 1e as good book not only by the cover but also by the content. This is one guide that can break don't ascertain book by its include, so do you still needing yet another sixth sense to pick this specific!? Oh come on your reading through sixth sense already told you so why you have to listening to another sixth sense.

Beth Kelly:

That guide can make you to feel relax. This specific book Manual Therapy in Children, 1e was multi-colored and of course has pictures around. As we know that book Manual Therapy in Children, 1e has many kinds or variety. Start from kids until teens. For example Naruto or Detective Conan you can read and believe that you are the character on there. Therefore , not at all of book are make you bored, any it can make you feel happy, fun and chill out. Try to choose the best book for yourself and try to like reading in which.

Dawn Nelson:

As a student exactly feel bored for you to reading. If their teacher expected them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's soul or real

their hobby. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading significantly. Any students feel that reading through is not important, boring along with can't see colorful images on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this age, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore , this Manual Therapy in Children, 1e can make you feel more interested to read.
