**Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards** By Morton Lippmann, Beverly S. Cohen, Richard B. Schlesinger

This is a broad, in-depth introduction to a scientific field that is becoming ever more central to human health. Environmental exposures to a bewildering array of chemical and physical agents result from our individual and collective activities, and can cause effects ranging from discomfort through loss of function, illness, chronic diseases, and premature death. Their concomitant effects on quality of life, productivity, and need for clinical services can be costly. The book covers the terminology used in environmental health; the sources of chemical and physical agents in the environment; how they disperse and transform throughout the environment; their effects on environmental quality and human health; how levels and exposures are quantified; how standards are established; how levels, exposures, and risks can be controlled; and what technological opportunities and trends are likely to influence our environmental future. It includes chapters on noise, ionizing radiation, non-ionizing radiation, risk assessment, and risk management. Written in a clear and systematic way, this text will be an invaluable resource for students of environmental health.

An earlier version of the book, *Chemical Contamination in the Human Environment* (OUP 1979), was called by one teacher "visionary...easily the most useful textbook in environmental health science for entry-level graduate students."

### **Editorial Review**

#### About the Author

Morton Lippmann is at New York University. Beverly S. Cohen is at NYU-EPA Pm Center, New York School of Medicine.

### **Users Review**

#### **From reader reviews:**

##### **Eva Dawson:**

Do you among people who can't read gratifying if the sentence chained inside the straightway, hold on guys this aren't like that. This Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards book is readable through you who hate the perfect word style. You will find the details here are arrange for enjoyable examining experience without leaving perhaps decrease the knowledge that want to supply to you. The writer of Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards content conveys prospect easily to understand by lots of people. The printed and e-book are not different in the information but it just different such as it. So , do you continue to thinking Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards is not loveable to be your top collection reading book?

##### **Roman Leonard:**

Reading a e-book tends to be new life style on this era globalization. With studying you can get a lot of information that will give you benefit in your life. Along with book everyone in this world may share their idea. Publications can also inspire a lot of people. Plenty of author can inspire all their reader with their story or perhaps their experience. Not only the storyline that share in the guides. But also they write about advantage about something that you need instance. How to get the good score toefl, or how to teach your children, there are many kinds of book which exist now. The authors on this planet always try to improve their skill in writing, they also doing some analysis before they write for their book. One of them is this Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards.

##### **Martina Smith:**

In this particular era which is the greater individual or who has ability in doing something more are more valuable than other. Do you want to become among it? It is just simple way to have that. What you have to do is just spending your time very little but quite enough to enjoy a look at some books. One of the books in the top list in your reading list is Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards. This book and that is qualified as The Hungry Slopes can get you closer in getting precious person. By looking way up and review this e-book you can get many advantages.

**Jose German:**

As a student exactly feel bored in order to reading. If their teacher requested them to go to the library as well as to make summary for some reserve, they are complained. Just very little students that has reading's heart or real their passion. They just do what the professor want, like asked to the library. They go to generally there but nothing reading really. Any students feel that studying is not important, boring along with can't see colorful photographs on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this age, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this Environmental Health Science: Recognition, Evaluation, and Control of Chemical and Physical Health Hazards can make you experience more interested to read.
