Naked Eggs and Flying Potatoes: Unforgettable Experiments That Make Science Fun (Steve Spangler Science) By Steve Spangler

From the creator of the mentos soda geyser--the viral video sensation--comes a collection of outrageously entertaining science experiments and cool tricks guaranteed to get ooohs and ahhs!

Author, celebrity teacher and science guy Steve Spangler teaches you how to transform the ordinary into the amazing as you make everyday items ooze, bubble, fizz, and pop! Make people wonder . . . How did you do that?

From flying toilet paper to trash can smoke rings, erupting soda to exploding sandwich bags, the experiments in *Naked Eggs and Flying Potatoes* will spark your imagination and totally impress your friends. Learn how to astound kids and kids-at-heart with easy and inexpensive experiments like:

- Bubbling Lava Bottle
- The Incredible Can Crusher
- Nails for Breakfast
- The Folding Egg
- Quicksand Goo
- Screaming Balloon
- Burning Money

This is not your ordinary book of science experiments. *Naked Eggs and Flying Potatoes* is a geek-chic look at Spangler's latest collection of tricks and try-it-at-home activities that reveal the secrets of science in unexpected ways. Over 200 color photographs accompany the step-by-step instructions, and simple explanations uncover the how-to and why for each activity.

Make potatoes fly, bowling balls float, and soda explode on command. But don't try these experiments at home . . . try them at a friend's home!

Editorial Review

From School Library Journal

Gr 4-9—Messy, daredevil, tongue-in-cheek, and definitely boy-friendly, this collection of science explorations will energize a boring afternoon or a routine science lesson. Grouped loosely under the headings “The Power of Air,” “Kitchen Chemistry,” “Dry Ice,” “Goopy Wonders,” and “Don’t Try This at Home...Try It at a Friend’s Home!” the experiments emphasize the fun before the facts and are arranged under the headings “Let’s Try It,” “Take It Further,” “What’s Going on Here?” and “Real-World Applications.” Adult help will be necessary to guide elementary-aged children through the wordy instructions and the use of dry ice, power tools, and stoves. Sharp, full-color photos appear throughout, but they’re not always informative. Adults dominate the images with an emphasis on the author’s appearances on *The Ellen DeGeneres Show*. Safety warnings are included at the front of the book, within experiments such as “Soup Soufflé” or “Naked Eggs,” and in the introduction to the “Dry Ice” section.—Carol S. Former elementary-school teacher Spangler has made a small empire out of finding the hands-on fun in science, with regular appearances on *The Ellen DeGeneres Show* and his own extensive website, on which he markets educational toys and products. The creator of the Mentos Diet Coke geyser experiment that became a YouTube video sensation, Spangler uses cheap, everyday materials to invent entertaining, highly kid-appealing activities, many of which are collected in this volume. Heavily illustrated with color photos and described in funny, casual prose, the experiments will easily engage a young audience, and each is followed by a succinct explanation of the science concepts at play, from the potato launcher, which encourages kids to shoot spud pellets at close range as they learn about pressure and volume, to bouncing and folding eggs and soda-bottle lava lamps, which demonstrate chemical reactions and density. Serious safety cautions appear throughout the irreverent chapters, while “Take It Further” sections encourage fired-up lab partners to continue the activities. A boon for parents and teachers alike, this should find a large, enthusiastic audience. Grades 3-6. --Gillian Engberg
