Real-World Machine Learning By Henrik Brink, Joseph Richards, Mark Fetherolf

Summary

Real-World Machine Learning is a practical guide designed to teach working developers the art of ML project execution. Without overdosing you on academic theory and complex mathematics, it introduces the day-to-day practice of machine learning, preparing you to successfully build and deploy powerful ML systems.

Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications.

About the Technology

Machine learning systems help you find valuable insights and patterns in data, which you'd never recognize with traditional methods. In the real world, ML techniques give you a way to identify trends, forecast behavior, and make fact-based recommendations. It's a hot and growing field, and up-to-speed ML developers are in demand.

About the Book

Real-World Machine Learning will teach you the concepts and techniques you need to be a successful machine learning practitioner without overdosing you on abstract theory and complex mathematics. By working through immediately relevant examples in Python, you'll build skills in data acquisition and modeling, classification, and regression. You'll also explore the most important tasks like model validation, optimization, scalability, and real-time streaming. When you're done, you'll be ready to successfully build, deploy, and maintain your own powerful ML systems.

What's Inside

- Predicting future behavior
- Performance evaluation and optimization
- Analyzing sentiment and making recommendations

About the Reader

No prior machine learning experience assumed. Readers should know Python.

About the Authors

Henrik Brink, Joseph Richards and **Mark Fetherolf** are experienced data scientists engaged in the daily practice of machine learning.

Table of Contents

THE MACHINE-LEARNING WORKFLOW

1. What is machine learning?
2. Real-world data
3. Modeling and prediction
4. Model evaluation and optimization
5. Basic feature engineering

PRACTICAL APPLICATION

6. Example: NYC taxi data
7. Advanced feature engineering
8. Advanced NLP example: movie review sentiment
9. Scaling machine-learning workflows
10. Example: digital display advertising

Editorial Review

About the Author

Henrik Brink is a data scientist and software developer with extensive ML experience in industry and academia.

Joseph Richards is a senior data scientist with expertise in applied statistics and predictive analytics. Henrik and Joseph are co-founders of wise.io, a leading developer of machine learning solutions for industry.

Mark Fetherolf is founder and President of data management and predictive analytics company, Numinary Data Science. He has worked as a statistician and analytics database developer in social science research, chemical engineering, information systems performance, capacity planning, cable television, and online advertising applications.

Users Review

From reader reviews:

Joseph Jackson:

In other case, little people like to read book Real-World Machine Learning. You can choose the best book if you appreciate reading a book. Provided that we know about how is important the book Real-World Machine Learning. You can add information and of course you can around the world by just a book. Absolutely right, since from book you can realize everything! From your country until eventually foreign or abroad you will be known. About simple factor until wonderful thing it is possible to know that. In this era, we can easily open a book or perhaps searching by internet product. It is called e-book. You need to use it when you feel bored stiff to go to the library. Let's go through.

Louise Villanueva:

This book untitled Real-World Machine Learning to be one of several books that best seller in this year, honestly, that is because when you read this guide you can get a lot of benefit in it. You will easily to buy this specific book in the book store or you can order it via online. The publisher on this book sells the e-book too. It makes you easier to read this book, because you can read this book in your Mobile phone. So there is no reason to you to past this reserve from your list.

Holly Murphy:

Reading a e-book tends to be new life style in this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can certainly

share their idea. Guides can also inspire a lot of people. A lot of author can inspire their particular reader with their story as well as their experience. Not only the story that share in the ebooks. But also they write about the ability about something that you need case in point. How to get the good score toefl, or how to teach your kids, there are many kinds of book that exist now. The authors these days always try to improve their proficiency in writing, they also doing some exploration before they write with their book. One of them is this Real-World Machine Learning.

Catherine Gates:

Is it anyone who having spare time then spend it whole day by watching television programs or just resting on the bed? Do you need something new? This Real-World Machine Learning can be the solution, oh how comes? A book you know. You are consequently out of date, spending your free time by reading in this brand new era is common not a nerd activity. So what these ebooks have than the others?
