Topics in Graph Automorphisms and Reconstruction (London Mathematical Society Student Texts) By Josef Lauri, Raffaele Scapellato

This volume provides in-depth coverage of selected areas of graph theory, with a main focus on symmetry properties of graphs. Standard topics on graph automorphisms are presented early on, while in later chapters, more specialized topics are tackled--such as graphical regular representations and pseudosimilarity. The final four chapters are devoted to the reconstruction problem; special emphasis is given to those results that involve the symmetry of graphs. Students who master the contents of this book will be well prepared for current research in many aspects of the theory of graph automorphisms and the reconstruction problem.

Editorial Review

Review

"This readable survey by Lauri and Scapellato covers considerable ground in a small number of pages. Recommended."

Choice

"...Would be a useful means for understanding the current state of research in graph theory and as such, it would be a valuable reference in any library."

Medhat H. Rahim, Lakehead University, School Science and Mathematics Journal

Users Review

From reader reviews:

Martha Wilson:

As people who live in often the modest era should be change about what going on or details even knowledge to make all of them keep up with the era and that is always change and move ahead. Some of you maybe can update themselves by reading through books. It is a good choice for yourself but the problems coming to you is you don't know what type you should start with. This Topics in Graph Automorphisms and Reconstruction (London Mathematical Society Student Texts) is our recommendation to make you keep up with the world. Why, since this book serves what you want and want in this era.

Allan Nguyen:

With this era which is the greater man or woman or who has ability to do something more are more special than other. Do you want to become considered one of it? It is just simple way to have that. What you have to do is just spending your time not much but quite enough to have a look at some books. One of the books in the top checklist in your reading list will be Topics in Graph Automorphisms and Reconstruction (London Mathematical Society Student Texts). This book that is certainly qualified as The Hungry Mountains can get you closer in becoming precious person. By looking upwards and review this reserve you can get many advantages.

Stephanie Sellers:

A lot of reserve has printed but it differs from the others. You can get it by internet on social media. You can choose the most effective book for you, science, comic, novel, or whatever by searching from it. It is known as of book Topics in Graph Automorphisms and Reconstruction (London Mathematical Society Student Texts). Contain your knowledge by it. Without making the printed book, it could possibly add your knowledge and make you happier to read. It is most critical that, you must aware about book. It can bring you from one location to other place.

John Almanzar:

Some people said that they feel bored when they reading a e-book. They are directly felt that when they get a half regions of the book. You can choose the particular book Topics in Graph Automorphisms and Reconstruction (London Mathematical Society Student Texts) to make your own reading is interesting. Your current skill of reading expertise is developing when you just like reading. Try to choose basic book to make you enjoy you just read it and mingle the sensation about book and examining especially. It is to be first opinion for you to like to open up a book and learn it. Beside that the reserve Topics in Graph Automorphisms and Reconstruction (London Mathematical Society Student Texts) can to be your new friend when you're truly feel alone and confuse using what must you're doing of this time.
